

## **ADDITIONAL INFORMATION**

### **### CARGOX**

#### **The CargoX Platform for Blockchain Document Transfer**

The CargoX Platform was developed for contactless, secure, fast, and cost-effective original document transfer in supply chains and adjacent industries, such as trading, manufacturing, finance, energy, services, regulators, and governmental agencies. The platform enables companies to avoid manually handling heaps of shipping and business paper documents.

It enables the simple creation, transfer, reception, processing, and archiving of confidential original documents, secured by blockchain technology, to protect confidentiality and privacy, while also ensuring ubiquitous auditability and traceability.

#### **CargoX: Protection & Indemnity coverage acceptance**

The CargoX Platform for Blockchain Document Transfer has been accepted by the International Group of Protection & Indemnity Clubs (IG P&I), a group of 13 P&I Associations, where 22 of the worlds top 25 reinsurers are featured, and who provide liability cover (P&I) for approximately 90% of all the global ocean-going tonnage.

#### **CargoX Platform awards and nominations**

The CargoX Platform has been operational since 2018 and has been awarded or recognized with glowing accolades many times by SXSW, Financial Times Intelligent Business conference, Transport & Logistics Middle East, International Road Transportation Union, DataccioConnect, FreightWaves, and more.
