

## **ADDITIONAL INFORMATION**

### **### PORT COMMUNITY SYSTEM**

#### **About Port Community System (PCS 1x)**

The new Indian Port Community system or PCS 1x designed, developed, and implemented by Portall is currently live in 19 Indian ports and connects over 16,000 unique logistics stakeholders to do digital business via the platform. PCS 1x is maintained under the aegis of the Indian Ports Association (IPA), MOS, GOI.

The success of the platform and the inroads made have set the ground for PCS 1x to further be enhanced into the nation's 1st National Logistics Portal or NLP. NLP will bring in domestic and EXIM, road, rail, air, and seal processes along with a single interface for over 56 participating government agencies.

The Indian digital drive pursues relentlessly its original aim to simplify clearance procedures of documents and cargo, facilitate the electronic exchange of trade documents on a single window and achieve a paperless regime for trade in India.

#### **ABOUT P-CaSo**

P-CaSo is a curated marketplace powered by Portall, with a palette of niche B2B and B2C cargo services for stakeholders in shipping and logistics. The first version has been released to the public based on strong demand and with unique niche digital solutions by P-CaSo service partners. The services offered on P-CaSo are as follows:

- Smart BL for trade document exchange for exporters, importers, and carriers
- Trucking services
- Seamless e-VGM services
- eLearning for reskilling and upskilling
